

# PRODUCTIVE PRACTICES Operator Stools

## DOCTOR'S / HYGIENE STOOLS

### **ErgoPro Straddle**

The ErgoPro Straddle is ergonomically designed straddle stool, offering forward and backward tilt.

The ErgoPro Straddle allows the practitioner the ability to sit higher, which positions the spine in a neutral position with your legs under you with your heels firmly on the floor. The sleek “saddle shaped seat” and smaller base allows for easy mobility and access to the patient.

### **ErgoPro 321**

The ErgoPro 321 combines unparalleled support with an elegant design. Its mechanism is the core of the stool's ability to adjust to an individual's personal seating requirements. Spring seat tilt and back tilt allows total control. The backrest and entire stool can be individually adjusted for height.

### **321 w/Relax & Hydro Arms**

Available shoulder support system offers relief to the neck and back, while providing full range of motion for both arms. The "Relax" and "Hydro" support Arms swing laterally side-to-side and telescope forward and back. The Hydro adds a third dimension through its tension-adjustable up and down motion.

**Productive Practices is a leader in providing health and efficiency solutions for the dental and medical professionals. Inspired by quality, 'best of breed' products, our mission is to continue to develop products that are focused on [Ensuring Health and Efficiency Through Productive Practices!](#)**

## ASSISTANT'S STOOLS

### **ErgoPro Assistant**

The Assist is ergonomically designed with the Assistant in mind.

The chair combines unparalleled support. The seat and back independently tilts with the body to allow support and neutralizes the spine.

ErgoPro Assistant is equipped with an Assistant Arm, foot ring and Chrome base. A one touch lever is used for the correct height adjustment.

### **Assist Straddle**

Ergonomically designed offering forward and backward tilt. The ErgoPro Assistant Straddle stool allows the Assistant the ability to sit higher, which positions the spine in a neutral position, with your legs under you and your heels firmly on the floor. The sleek “saddle shaped seat” and smaller base allows for easy movability and access to the patient.

### **Assist 2**

Ergonomically designed ErgoPro Assist 2 offers an alternative to the ErgoPro Assistant Stool. Featured with a stationary seat without a back rest. One touch lever allows the height adjustment to meet the need for proper height.

ErgoPro Assist 2 is equipped with an Assistant Arm, foot ring and chrome base. Available Backrest Option.

**ALL STOOLS ARE AVAILABLE IN STANDARD AND  
ULTRALEATHER VINYL**
